SUMMARY

Senior Full Stack Developer with 8+ years of experience building scalable web applications using **Python**, **JavaScript**, **TypeScript**, **React**, and **AWS**. Skilled in **Django**, **FastAPI**, **Node.js**, **React**, **REST APIs**, **PostgreSQL**, **Docker**, and **CI/CD** across SaaS and enterprise projects. Strong problem solver and communicator who collaborates with product and engineering teams, owns complex features, and delivers reliable solutions.

SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, Java, HTML5, CSS3, SQL
- **Frontend Development:** React, Redux Toolkit, React Query, React Hooks, Context API, Next.js, NestJS
- **Backend Development:** Django, Django REST Framework, FastAPI, Node.js, Express.js, Spring Boot, Spring MVC, REST APIs
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Spring Data JPA, Hibernate
- **Cloud:** AWS, Lambda, ECS, RDS, S3, CloudWatch
- **DevOps:** Docker, Kubernetes, GitHub Actions, CI/CD, Git, GitHub
- **Testing:** Pytest, Jest, Unit Testing, Integration Testing, API Testing
- **Architecture:** Microservices, RESTful Architecture, API Integration, Scalable Web Applications
- **Tools:** Jira, Linux, Postman, Agile/Scrum
- **Soft Skills:** Problem Solving, Communication, Team Collaboration, Mentoring, Code Review, Requirements Analysis, Technical Leadership

EXPERIENCE

Senior Full-Stack Developer | Anchorstacktech **Chicago, US | Remote | *1/2024 – 6/2026***

- Architected scalable applications with **Python**, **React**, and **AWS Lambda**, cutting average API response time from 1.8s to 650ms and improving platform stability.
- Modernized legacy services using **Django**, **PostgreSQL**, and **AWS RDS**, reducing production errors from 14% to 4% while supporting higher transaction volumes.
- Optimized customer dashboards with **React**, **FastAPI**, and **Redis**, reducing page load time from 4.2s to 1.7s and improving responsiveness for daily users.
- Developed secure REST services with **FastAPI** and **SQLAlchemy**, resolving data-processing bottlenecks and simplifying integration with external systems.
- Automated cloud deployments with **AWS ECS** and **Docker**, improving release consistency and reducing manual deployment work across development environments.
- Implemented reusable interfaces with **React Hooks** and **Context API**, improving frontend maintainability and creating consistent user experiences.
- Collaborated with product teams to translate complex business requirements into practical technical solutions.
- Mentored developers through code reviews and debugging sessions while promoting clean development practices.

Software Engineer | Exomindset **California, US | Remote | 2/2022 – 12/2023**

- Built web applications with **JavaScript**, **TypeScript**, and **React**, reducing frontend defects from 18% to 6%.
- Automated deployments with **Docker**, **GitHub Actions**, and **AWS ECS**, cutting deployment time from 45 to 12 minutes.
- Created reusable components with **React** and **TypeScript**, improving UI consistency and development speed.
- Developed backend services with **Java**, **Spring Boot**, and **Spring MVC**, improving application reliability.
- Built **REST APIs** with **Java** and **Spring Boot** for frontend and service integrations.
- Managed data access with **Spring Data JPA**, **Hibernate**, and **SQL**, simplifying database operations.
- Integrated services with **Node.js** and **Express.js**, improving data flow across applications.
- Collaborated with developers and stakeholders to clarify requirements and deliver features on time.

Software Engineer | NIC **Yucatan, Mexico | On-site | 8/2021 – 1/2022**

- Delivered full-stack platforms with **Python**, **JavaScript**, and **React**, reducing average feature delivery time from 15 to 9 days through reusable architecture.
- Improved backend performance using **Python**, **Django REST Framework**, and **PostgreSQL**, reducing complex query latency from 2.4s to 800ms.
- Redesigned responsive interfaces with **JavaScript**, **React**, and **Redux Toolkit**, lowering frontend errors from 12% to 4% while improving application usability.
- Developed API integrations using **Python** and **FastAPI**, resolving synchronization issues between internal applications and third-party business systems.
- Strengthened application testing with **Pytest** and **Jest**, identifying regression issues earlier and supporting more reliable production releases.
- Communicated technical requirements clearly with cross-functional teams to prevent blockers during development.

Web Developer | OBT IT Services, Internship **Varacruz, Mexico | 7/2018 – 10/2020**

- Assisted in developing web features with **JavaScript**, **React**, and **Jest**, helping reduce reported frontend defects from 15% to 8% across assigned modules.
- Tested application components using **Jest**, **React Testing Library**, and **JavaScript**, increasing test coverage from 55% to 78% for maintained frontend features.
- Debugged user interface issues with **JavaScript**, **Chrome DevTools**, and **Git**, reducing unresolved development tickets from 20 to 9 during the internship.
- Supported frontend development using **JavaScript** and **React**, fixing UI issues and improving reusable components under senior developer guidance.
- Created automated test cases with **Jest** and **React Testing Library**, helping identify regressions before application releases.
- Maintained source code with **Git** and **GitHub**, supporting team workflows, pull requests, and organized version control.
- Communicated testing results clearly and documented identified defects to support faster issue resolution.

EDUCATION

Bachelor's Degree in Software Engineering | Universidad Modelo | 8/2017 – 7/2021
